SUMMARY

An experienced Full stack developer and GenAI enthusiast, building innovative tools and solutions.

SKILLS

- **Programming Languages:** TypeScript (Advanced), Python (Intermediate).
- **Web Development:** HTML, CSS, JS, Figma, React.js, Next.js (Advanced), Fastify, Node.js, FastAPI, Express.
- **Mobile Development:** React Native with Expo.
- **Databases:** Postgres, Redis, MongoDB, MySQL & Neo4j.
- **Technologies**: Vercel, Cloudflare, Docker, Google Cloud, AWS (S3, Lambda, RDS), Cloudflare (Workers, D2 & R1).

EXPERIENCE

SDE - 1   **Feb 2025 - Current**
Asymmetri Innovations
- Developed the complete backend and admin panel for Zimkey (a platform similar to Urban Company) using TypeScript, Prisma, Fastify, Next.js, and Razorpay.
- Working on Komerz, A AI Based market analysis report generator using Vercel AI SDK, Next.js, Neo4j, & RAAG.

SDE Intern   **Jun 2024 - Jan 2025**
Outpost Innovations, Inc.
- Developed key backend features, integrated a Git server with the main backend to enable model deployment.
- Wrote billing logic for GPU usage, compute resources, runtime, egress data, and Stripe integration.
- Worked on building the frontend for outpost.run using Next.js, TypeScript, and Tailwind. Contributed to key features, including the model deployment dashboard, landing page, and documentation.

Freelance Content and UI/UX Designer   **Jun 2022 - Dec 2023**
Fiverr
- Worked as a Content and UI/UX Designer for over 25+ international clients and completed over 50+ orders.
- Skills applied include Figma, Adobe Premiere Pro & After Effects.
- Top clients: codedex.io, launchagency.co.nz

PROJECTS

Elkagent

Built and launched Elkagent.com, a SaaS platform that enables businesses to integrate AI-powered customer support agents into their websites. Designed and implemented features for agent creation, knowledge ingestion (via website links, documents, and articles), chatbot customization, and seamless widget embedding. Developed the backend and dashboard with TypeScript, Next.js, Drizzle & Vercel AI SDK, ensuring scalability, security, and a smooth user experience.

AI Diagramming Tool

Built a SaaS platform, ezdiagram.com, to simplify diagramming and documentation. Using AI, it generates PlantUML and Mermaid.js architecture diagrams through prompts. With over 10,000+ visitors, the platform has created over 1,000 diagrams via AI. The tech stack includes Next.js, TypeScript, Supabase, OpenAI API, AWS Bedrock, Mermaid.js, Zustand, Tailwind CSS. The source code is confidential but can be shared upon request.

EDUCATION

Bachelor's in Information Science & Engineering   **2021 - 2025**
RV Institute of Technology and Management, Bangalore, India
